

SPEED-TERM TOOL FOR 90° KEYSTONE JACK

This patented tool significantly reduces termination time for keystone jack, resulting in cost saving and job time.

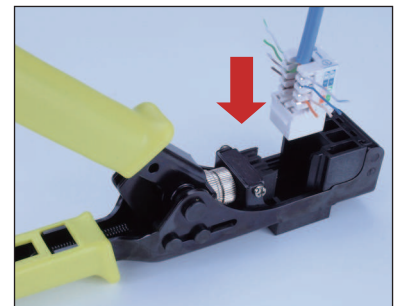

- Terminates & cuts 8 wires at one time.
- All work can be done hand held.
- No need for impact chassis.
- Simple operation.

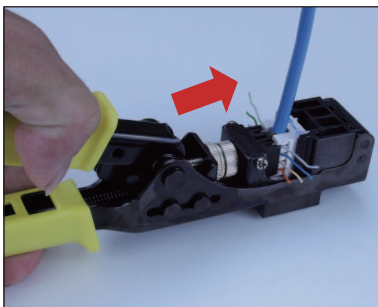

1 Strip outer sheath 3cm.

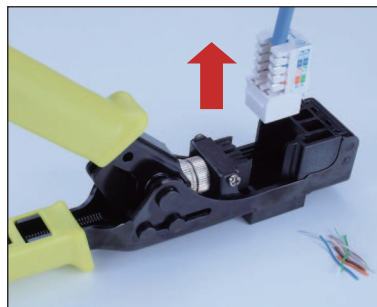

2 Fan out wires.

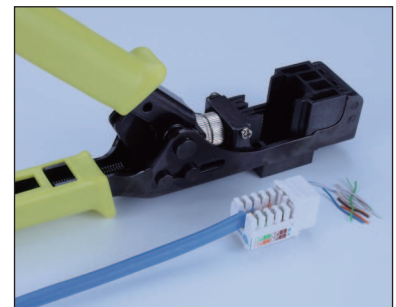

3 Insert jack.

4 Compress handle.

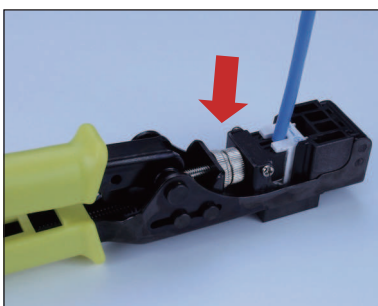

5 Remove jack.

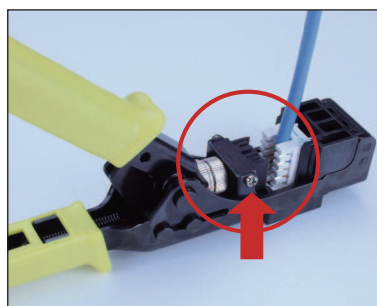

6 Completed.

NOTE

The termination/cutting depth may be varied by rotating the adjustment knobs.

Unscrew 2 screws to change blade.

Compatible keystone jack 90° narrow type, dual & 110 IDC block.
