

S10

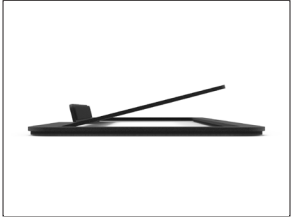

S10 center channel speaker stand allows listeners to extract everything their compact center channel speaker or high-end sound bar has to offer. 12 degrees of upward tilt point the speaker toward the listener's ear to deliver flawless, on-axis response and lifts the speaker from the furniture surface to reduce early reflections improving clarity. Foam dampening and a bent metal design absorb vibrations to lessen distracting rattling caused by resonances in the room. The low-profile design allows for lower TV placement compared to traditional pedestal-style speaker stands resulting in a more comfortable viewing position. S10 is compatible with center channels and sound bars 5.5"-6.9" deep and 16"-36" wide.
