REN

The Simplicity of a Soundbar, the True Sound of Stereo.

Combining the simplicity of a soundbar with the accuracy of a DSP-controlled stereo system, REN seamlessly integrates with any modern TV via HDMI ARC, delivering a home theater-like experience in one streamlined package. REN tackles the frustration of quiet dialogue and overwhelming sound effects with two sound modes that boost vocals and reduce low frequencies for nighttime viewing. When it's time to add a subwoofer, REN automatically filters sub-bass from its 5.25" aluminum woofers, letting them focus on midrange frequencies with minimal distortion. REN offers versatility beyond the living room with Bluetooth 5.3 for smart home devices, optical for WiFi network streamers, USB-C for desktop use, and analog inputs for everything else.

FEATURES & SPECIFICATIONS

Tweeters	1" silk dome	Bottom Mounting Hole	1/4"-20
Woofers	5.25" aluminum concave cone	Input Voltage / Frequency	AC 100 V - 240 V 50/60 Hz
Amplifier Type	Class D	Auto Power Down	Yes (can be disabled for always on operation)
Power Output	200 W peak power (100 W total RMS)	Auto Power Up	Yes (can be disabled)
Frequency Response	50 Hz - 22 kHz	Standby Power Consumption	< 0.5 W
High/Low-Pass Filter	80 Hz (automatic)	Remote	Included
Inputs	1 x HDMI ARC with CEC	Speaker Grille	Included
	1 x USB-C (24 bit/96 kHz)		
	1 x Optical (TOSLINK) (24 bit/96 kHz)	Dimensions (each speaker)	7" W x 8.5" D x 10.9" H (17.8 x 21.5 x 27.7 cm)
	1 x Bluetooth® 5.3 with AAC	Net Weight (active)	9.9 lb (4.5 kg)
	1 x RCA	Net Weight (passive)	8.6 lb (3.9 kg)
	1 x 3.5 mm mini-jack AUX	Gross Weight (boxed pair)	24 lb (10.9 kg)
Outputs	1 x sub-out	Shipping Box Dimensions	12.8" W x 19.4" D x 15.6" H (32.5 x 49.2 x 39.7 cm)
	1 x USB Charge 5 V 1 A		
Sound Modes	Vocal Boost and Night Mode		
Speaker Terminals	Active to passive knurled five-way binding post

SEAMLESS TV INTEGRATION

Featuring HDMI ARC with CEC, REN offers the same kind of seamless TV integration that an AV receiver or soundbar provides. REN automatically wakes when the TV is turned on and can be controlled with the TV remote. No need for multiple remotes or bulky gear to get premium sound from your TV.
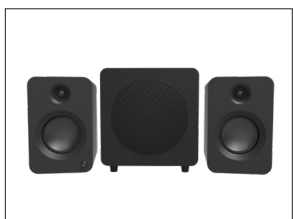

TRUE STEREO SOUND

Soundbars rarely extend past your TV and rely on digital processing to simulate a wider soundstage. You can place REN as far apart as you like giving you a true wide soundstage with pinpoint precision of where the action is happening on the screen. Achieve true stereo sound and leave the gimmicks behind.

VOCAL BOOST & NIGHT MODE

REN is DSP-controlled, allowing for custom sound modes like Vocal Boost and Night Mode to improve quiet dialogue and soften loud sound effects when watching movies at night. Never miss a line of dialogue or accidentally wake up the neighbors again.

BASS MANAGEMENT

When a subwoofer is plugged into REN's sub output, REN automatically sends all frequencies below 80 Hz to the sub letting the speakers focus on what they do best while reducing distortion at higher volume levels. Expand your system when you're ready and get even better sound.
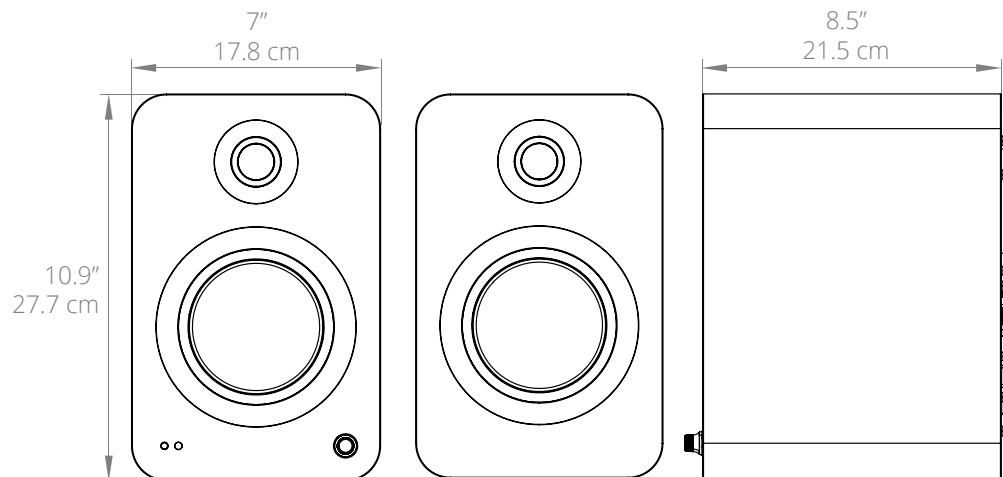

PLUG 'N PLAY

REN has nearly every connection option available from USB-C for desktop use, Bluetooth 5.3 for mobile devices, optical for digital media, to RCA and AUX for analog gear. The connectivity and versatility to work with any piece of gear, in any scenario, past, present, or future.

FULL CONTROL

REN's remote can swap the left and right channels, disable auto power-down, dim the front LED, mute an attached sub, control USB or Bluetooth playback, and adjust tone to dial in bass and treble.
